Ruminant Free

FEEDING DIRECTIONS:

Feed FLOATING GAME FISH FEED as follows:

- A. Feed at least once a day, either early morning or late afternoon at two to five pounds per acre. Broadcasting of the feed should always take place at the same time and from the same location.
- B. Feed approximately the amount they will clean up in 20 to 30 minutes. Depending upon the feeding activity of the fish, increase or decrease the amount accordingly. Feed rate should not exceed ten pounds per day without aeration. Reduce amount of feed when water temperature drops below 55 degrees F. Overfeeding will result in oxygen depletion.
