Ruminant Free

FEEDING DIRECTIONS

Feed FLOATING TILAPIA FEED as follows:

- A. Feed at least once a day, either early morning or late afternoon at four feeding stations per acre.
- B. Feed approximately the amount they will clean up in 20 to 30 minutes, or at the rate of 3 to 5 percent of the body weight of the fish per day. Depending upon the feeding activity of the fish, increase or decrease the amount accordingly. Reduce amount of feed when water temperature drops below 55 degrees F.
- C. Caution - Do not Overfeed. Overfeeding will result in oxygen depletion in the water, causing a sour pond.
